### CERAMIC INSULATORS FOR SPARK PLUGS

<b>No. Characteristic Index</b>	<b>Model</b>	<b>F series</b>	<b>K series</b>	<b>Φ 10mm, Φ 12mm lengthened series</b>
<b>Ceramic Density (g/cm<sup>3</sup>)</b>		≥3.70	≥3.70	≥3.70
<b>Anti-Electric Performance (Kv)</b>		≥38	≥38	≥38
<b>Flexural Strength (N)</b>		≥600	≥450	≥380
<b>Appearance Color</b>		White	White	White

### ALUMINA CERAMIC PRODUCTS

- The company specializes in the production of spark plug ceramic insulators, ceramic tubes, oil well igniters and other related products.
- We use isostatic pressing to form, and use high temperature to sinter into ceramic.
- The product has high density, high strength, good electric resistance and good size consistency.
- We're able to produce various spark plugs, ceramic tubes and other products with length less than 150 mm according to customer requests.
